

Joy-CamScan L`S

CamScan has been widely used in finance, insurance, securities, telecommunications, social security, public security law, civil affairs, e-government and other business windows. It's a new type of business window scanning equipment, which has the following characteristics: one-second high-speed scanning of a variety of formats, OCR character recognition function, and real-time image effect processing through the software. We provide TWAIN standard interface, SDK/API/DEMO, etc. for secondary development.

Optical Character Recognition

1 second fast scanning speed

3-dimensional shooting

Scan size up to A2

Key Features

Scan size up to A2

Scanning document size up to A2, with upmost 16 MP camera to shoot HD images.

All-round scan

It is ideal for digitizing books, magazines, drawings, maps, newspaper, office documents, bills etc.

Timing shooting

Automatically scan after setting the interval time, dramatically time-saving for scanning large volumes of files and documents.

TWAIN Driver

Doccamera TWAIN driver is a standard scanner driver from JoyUsing, and compatible with all TWAIN software.

Office Assistance

Scanned images can be directly printed, faxed or emailed, it helps make your office work easier.

SDK Software Development Kit

Provide complete SDK, interface document and DEMO

OCR (Optical Character Recognition)

Embedded with ABBYY FineReader character recognition engine, supports nearly 200 languages, with high speed recognition, and accuracy up to 98%.

Industrial applications

Joy-CamScan products are more widely found in various institution service windows, such as convenience centers of governments, banks, social insurance service, public security systems, medical industry etc., as well as documents digitizing in offices, educational trainings, customs, logistics etc.

Specifications

Model	L5	L10	L14	L16
Pixels	5MP	8MP	14MP	16MP
Resolution	2592 × 1944	3651 × 2738	4536 × 3024	4608 × 3456
Sensor	1/4" CMOS	1/3.2" CMOS	1/2.3" CMOS	1/2.3" CMOS
Color	RGB24 True color			
Focus	Fixed	Auto	Fixed	Fixed
Exposure Mode	Auto/Manual			
Scan size	A4	A4	A3	A2
Image format	JPG, GIF, TIF, PNG, BMP, PDF, etc.			
Image size	Color ≤ 300K; B/W ≤ 60K			
Image quality	No visible flicker, ripple, noise, etc. No impact by common light			
Light source	Natural light, stepless light			
Shooting speed	≤ 1s			
Dimensions	342 × 335 × 318mm	342 × 335 × 318mm	342 × 335 × 318mm	528 × 182 × 122mm
Interface	USB2.0			
Secondary development	Provide SDK and DEMO			
<p>★ LED light is a standard light source in this Joy-CamScan series, and the optionals are ID reader, fingerprint scanner, sub camera, 2nd sub camera etc.</p>
